

Paint Symmetry

Directions:

1. Take a piece of white construction paper and fold it in half.
2. Then put three to five colors of paint in the fold (use a thicker paint), be generous with your drops of paint.
3. Then have your child close the paper and rub it from the crease toward the outside of the paper to spread the paint.
4. Open up the paper to see their original creation.
5. Each side should be symmetrical.
6. Talk about their picture and symmetry.
