

## Making Numbers

### Before Playing:

1. Run off the Hundreds, Tens, and Ones game board.
2. Run off the hundreds, tens and ones numbers and cut apart.

### Directions:

1. Put a number in the ones column. Ask, "What number do I have in the ones column?"
2. Put the number 5 in the ones column and \_\_\_\_ number in the tens column counting up by 10's. (Example: 5, 15, 25, 35, 45 ...)
3. Put the number 5 in the ones column and 70 in the tens column, and \_\_\_\_ in the hundreds column count up by 100's. (Example: 175, 275, 375, 475...)
4. Put \_\_\_\_ numbers in the ones column, \_\_\_\_ numbers in the tens column, and \_\_\_\_ numbers in the hundreds column. Add and subtract using the numbers. Make sure you are using forward counting and counting backward so your child is very familiar with place value through the hundreds.
