

## Writing Numbers 0-1,000

### Before Starting:

\*Gather wipe off boards and markers or paper and markers.

### Directions:

1. One person says a number (0-1,000) and the other person has to write the number.
2. Take turns asking and writing numbers.
3. Another game is to give clues to a number and the other person has to write it; be as creative with your clues as you can be. (Example: I have 900 buttons then I find 27 more. How many buttons do I have now?)
