

## Adding and Subtracting to \$1.00

### Before Playing:

1. You will need 4 quarters, 2 half dollars, and 10 dimes, 20 nickels, and 25 pennies.

### Directions:

1. Go over how much each coin is worth. Count up each coin values.
2. Take turns asking for certain amounts of money up to \$1.00. Can you give that amount in other coins? What is the least amount of coins to make that amount?
3. Put out two amounts of coins up to \$1.00. Then add up the two amounts of money. Then write down the two amounts on a wipe off board to see if you added them correctly.
4. Put out two amounts of coins up to \$1.00. Then see which amount of coins is the highest and subtract the two amounts of coins. Then write down the two amounts on a wipe off board to see if you subtracted correctly.
