

## Check-Up for Subtraction to 10

\*Ask your child, "What does it mean to subtract?"

0 My child can explain the concept of subtraction.

\*Put out two collections but don't go over 10 pieces in any collection. Put the larger collection to the left and the other collection on the right. Have your child tell you how many more pieces are in the first collection.

0 My child can subtract collections up to 10 pieces.

\*You will need a number line to 10. Ask your child to subtract  $9-3=$ \_\_\_\_\_ using the number line.

0 My child can use a number line to subtract up to 10.

\*Run off the sheet, Quick Subtraction to 10 and have your child do this sheet on their own.

0 My child had 100% on the Quick Subtraction to 10.
