Picture Story Patterns Using Division

Children need to be fluent with division patterns. The more children work with numbers and patterns the easier number patterns become.

One person asks a division pattern question and the other person has to answer it as quickly as they can.

Example:

There are 8 cookies and 4 children. How many cookies will each child get?

There are 8 cookies and 2 children. How many cookies will each child get?

There are 15 cookies and 5 children. How many cookies will each child get?

There are 15 cookies and 3 children. How many cookies will each child get?

There are 40 cookies and 10 children. How many cookies will each child get?

There are 40 cookies and 8 children. How many cookies will each child get?

There are _____ cookies and _____ children. How many cookies will each child get?
