

Check-Up for Volume

*Run off the sheet, Volume. Ask your child to circle the cups that hold the least amount of water.

O My child understands the concept of volume and my child can do the Volume sheet with 100% accuracy.

*Run off the sheet Making Shapes and Finding the Volume. Have your child do the even questions by actually making the shapes and figuring out the volume.

O My child understands how to find volume using centimeter cubes and he had 100% correct on the questions.
